# Residential Market Report Overview

The Brooklyn Market Report is organized in six distinct sections and it is designed as a guide to the borough's residential market. The report includes key market stats, the most up-to-date monthly sales data, and charts that give a clear picture of current market conditions.

The first section - Residential Market Overview - shows the borough's median sale price per property and per square foot, together with trends and changes over the past year. The second section informs on the borough's most expensive sales for each residential property type included: single-family homes, condo and co-op units.

Then, the last four sections of the report take a closer look at Brooklyn's neighborhoods: informative sales maps are complemented by a section dedicated to the borough's most expensive neighborhoods ranked by median sales price per square foot. Each Brooklyn neighborhood has a dedicated one-page snapshot, which includes a short description of the neighborhood's profile, plus useful sales stats: median sale price, median sale price per square foot, number of transactions and a breakdown by type of residential properties sold.
